Brief description

This plot in Rojas offers a well-defined triangular parcel of land measuring 1,010 m², positioned at a street corner with road access on two sides. The location within Alicante provides a practical setting for development, supported by existing urban infrastructure visible in the surrounding area.

The plot includes permission for a basement and a garage, which adds valuable potential for building with additional underground space and secure parking. The shape and size of the land allow for flexible architectural planning, making it suitable for a variety of construction projects.
